architectural lighting

A large, illuminated, abstract sculpture, possibly the 'The Sphere' by Fritz Koenig, is the central focus. It is a large, rounded, metallic structure with a textured, crumpled surface, glowing with a warm, golden light. The sculpture is set in a city at night, with several skyscrapers in the background, their windows lit up. An American flag is visible on a pole in the middle ground. The overall scene is a vibrant urban nightscape.

Hubbell Lighting, Inc.

It's not just our logo that has changed.

The fastest, easiest way to reduce lighting costs is with Alanod®, America's leading supplier of reflective surfaces. MIRO®, with 95% total reflectivity is our most reflective surface. MIRO produces more light with less energy and that means significant cost savings-savings that extend beyond energy to fewer fixtures.

MIRO is available in a broad range of surfaces, affording the lighting engineer unlimited design options. With MIRO, directing light where you want it is within your control.

Only MIRO can meet your demanding specs with a 25-year warranty against surface deterioration. And unlike other surfaces, MIRO won't delaminate, yellow, darken, blister or crack. That's why so many professionals specify Alanod for retrofit as well as new projects.

editor's note

It's the 2003 Lighting Source Directory, complete with manufacturer contacts (more than 1,000!) and a listing of what they make. We've tried to ensure that all that should be included are included and that the information is accurate and current. We did, however, switch to a new system this year to input data, record information updates and to produce the most comprehensive, user-friendly and complete lighting manufacturer directory. What this means, as with any new system, is that there were a few glitches. Nothing major, but we do want to be absolutely sure that what we're printing is, indeed, correct. So, please, take a minute to check your listing, and if it needs to be changed in any way, log on to www.mediabrain.com/client/design/bg1/vp/register_login1.asp to register the correction or call Antoinette Beckles at (646) 654-7582 for assistance.

COVER PHOTO: © PAUL KEVIN PICONE

On the cover: The City of New York Parks & Recreation, The Battery Conservancy, Consolidated Edison and Osram Sylvania joined together to provide a new lighting system in The Battery as part of a continuing effort to revitalize lower Manhattan. Fritz Koenig's *The Sphere*, which is front and center on this issue's cover, was recovered from the granite fountain in the center of the five-acre World Trade Center Plaza. The sculpture, which was once visited by many daily—both workers and tourists—as a point of welcome to the Twin Towers, now stands only a few blocks away in a very different environment. *The Sphere*, salvaged from the horrific collapse, was illuminated on September 18 of this year, and the Eternal Flame, on September 11, to serve as a memorial commemorating the lives lost in 2001's terrorist attack and in the 1993 WTC bombing.

The lighting, part of an ongoing plan to rejuvenate the once-vital downtown, features ceramic metal halide 70W PAR30 10-degree spot lamps (85 CRI) in fixtures that are mounted on custom-designed ladder rests on four existing lampposts bordering the sculpture on the Eisenhower Mall. The ambient lighting for the Mall has also been upgraded with 20 induction-lighting systems with 100W ballasts installed in fixtures on existing lampposts in the park.

In a ceremony that presented the partnership, unveiled the new lighting and honored the victims, representatives from each organization spoke not only of remembrance but of the continuing commitment to give new life to places that celebrate our country's rich history—and a multi-phase plan for The Battery, which has been the core of the Big Apple for a few hundred years. In fact, according to

Adrian Benepe, Commissioner, City of New York Parks & Recreation, "Battery Park is the place where New York City started. With our major renovation underway and more visitors coming to pay homage to the World Trade Center memorials, this new lighting is being introduced at just the right time."

After years of neglect, the Conservancy for Historic Battery Park created seven capital projects to restore beauty and energy to the 23 acres that comprise the site. With two projects completed (Upper Promenade and Dewey Promenade) and more on the way, the rejuvenation of downtown is in sight. "This park has a tradition of providing outdoor life for lower Manhattan," said Warrie Price, president of the Battery Conservancy, "and the new lighting is symbolic of the rebirth of downtown."

After the ceremony, a reception was held in Castle Clinton, which is currently being redesigned by the architectural team of Beyer Blinder Belle Architects and Thomas Phifer and Partners to once again become a vibrant destination for cultural life in lower Manhattan. The Castle and Garden have been part of The Battery since 1811. From fort to opera house to immigration center to aquarium, from offshore island to inland park, the Castle has always responded to the needs of the dynamic city. The redesigned structure will be a hub of heritage tourism, an innovative venue for the performing arts and an educational center.

And on a related, yet totally different note—no pun intended—I have to mention a part of the event that particularly thrilled me: The National Anthem was sung by Jane Monheit, a jazz artist in her early 20s, born and raised on—my personal fave place to live—Long Island. She's not a household name, but I've been a fan of her, absolutely adore her voice and her music reminds me of special times. What a wonderful treat to hear her perform live—even if just one song—for the intimate crowd gathered at the site. So, in the spirit of the holiday season and gift-giving, let me provide a suggestion, even if just for yourself: Her CD *Never Never Land* (she does a wonderful rendition of "I've Got It Bad" and "More Than You Know"). You won't be disappointed ... ■

LUMILEDS AND NICHIA SIGN AGREEMENT

Lumileds Lighting and Nichia Corp. have signed a broad cross-licensing agreement under which the two companies will share intellectual property rights to their respective LED technologies. Designed to avert patent disputes and potential associated supply issues, the pact is also expected to accelerate the design of more powerful LEDs by enabling each company to incorporate the research and development efforts of the other in new product development and consequently, will expedite the adoption of LEDs in the general lighting arena.

A joint venture between Philips Lighting and Agilent Technologies, Lumileds is headquartered in San Jose, CA and may be contacted by phone at (877) 298-9455 or by visiting www.lumileds.com. Established in Japan in 1956, Nichia Corp. has operations throughout the world, including Mountville, PA-based subsidiary Nichia America Corp. Visit Nichia's website at www.nichia.co.jp.

NEW PROGRAM EXAMINES LEDS

Intertech Corp. has announced the launch of a new program to assess global market opportunities for LEDs. The study, titled "A Market and Technical Assessment of Light-Emitting Diodes for Lighting and Display Applications," is expected to conclude in March 2003 and will include data and narrative on the global LED supply chain, technology status, applications, research and development roadmaps, comparisons to other light sources and display technology, costs, economics, environmental impacts, standardization metrics and system design issues.

The study will also detail all of the major international market

COMPANIES CHANGE NAME

Both divisions of **Auerbach + Associates** have changed their names to reflect more accurately recent company expansion. The architectural lighting design division is now Auerbach • Glasow, Architectural Lighting Designers and Consultants. Auerbach + Associates, Theatre and Media Facilities Design Consultants is now Auerbach • Pollock • Friedlander, Performing Arts/Media Facilities Planning and Design. For more firm information, visit www.auerbachconsultants.com.

Texas-based **Bright Lighting** has changed its name to **Pixeon**, which according to Nils Thorjussen, "is short for pixelated neon, which is exactly what our debut product Color Stream looks like." For more information, visit www.pixeon.com or phone (512) 834-2624.

VARI-LITE SELLS MFG. DIVISION

Vari-Lite International, Inc. has sold the assets of its Vari*Lite products manufacturing and sales division to Genlyte Thomas Group LLC. The sale includes the Vari*Lite family of products as well as all sales, manufacturing and engineering operations associated with the division. The Genlyte Thomas Group has also acquired the Vari*Lite trademark and all related patents. Following the sale, Vari-Lite International, Inc. will ultimately assume the name of VLPS Lighting Services International, Inc. and continue to service the entertainment industry.

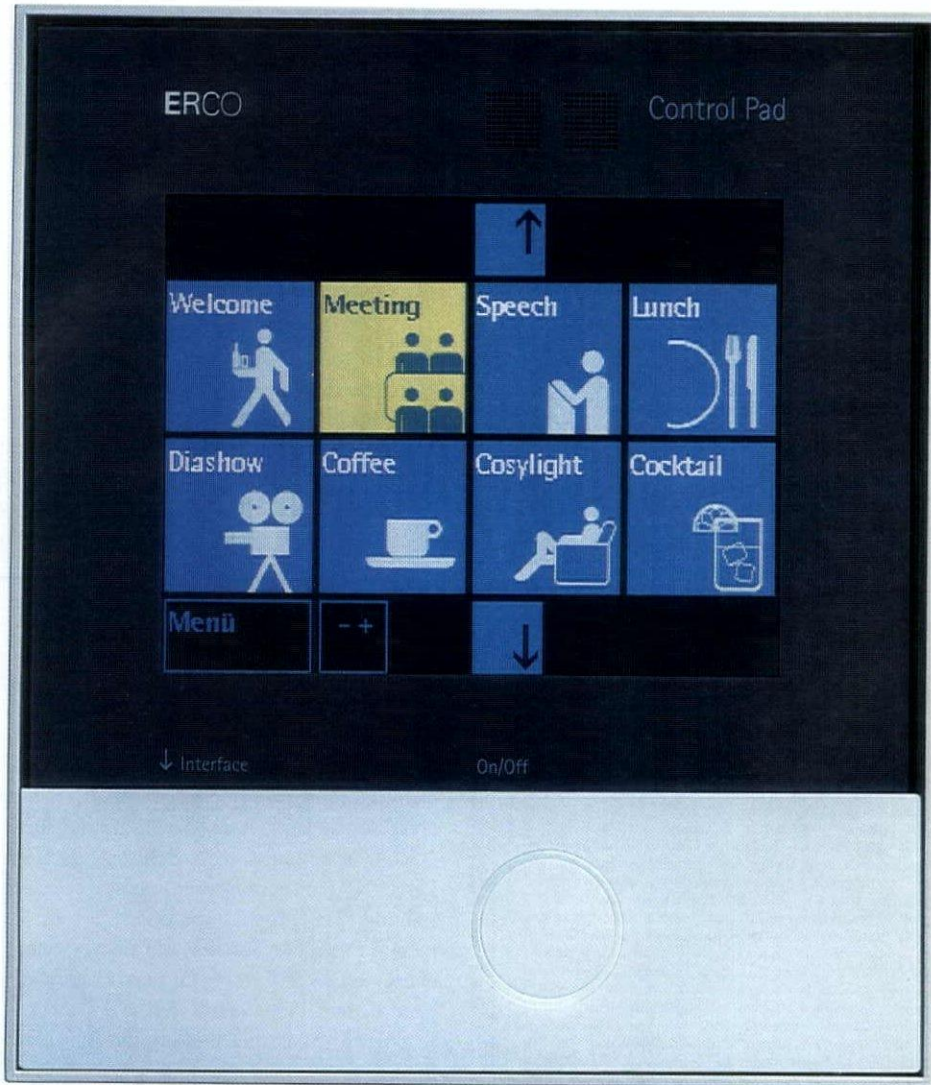

INGO MAURER INSTALLATION OPENS IN PA

"The Light Magic of Ingo Maurer," an installation, has opened in the Philadelphia Museum of Art and will run until February 23, 2003. Located in The Grand Salon in Gallery 260, the installation was inaugurated with the presentation of the 2002 Collab Design Excellence award to Maurer on November 20. The award is given annually by Collab, a nonprofit organization that raises funds for the Museum's modern and contemporary design collection, to a design professional who has made a significant contribution to the field. For more information, visit www.philamuseum.org.

players, including all related manufacturers, distributors, conferences, associations and web and literature resources. This information as well as other data and contact information will be excerpted and distributed in a stand-alone directory titled, "The LED Lighting and Display Guide and Source Directory." For more information on these LED publications, contact Dr. Hugh Olmstead, LED Program Director, Intertech Corp., 19 Northbrook Drive, Portland, ME 94195; phone (207) 781-9606, fax (207) 781-2150, email olmstead@intertechusa.com or visit www.intertechusa.com.

EDISON AWARD CALLS FOR ENTRIES

GE Lighting has announced a call for entries for its 20th Annual Edison Award, which recognizes excellence and quality in professional lighting designs that employ significant use of GE lamps. Open to all professional designers, architects, engineers and consultants (except GE employees), the competition welcomes lighting design projects completed during the 2002 calendar year. Entries will be judged on functional excellence, architectural compatibility, effective use of state-of-the-art lighting products and techniques, appropriate color, form and texture revelation, energy effectiveness and cost effectiveness. A new element for 2002, special recognition will be given to project demonstrating exemplary, sustainable lighting design. The deadline for submissions is 5:00 pm EST on February 3, 2003. For more information, log onto www.edisonaward.com.

LIGHTOLIER HOSTS THREE "LST" SEMINARS IN 2003

Lightolier has announced three Lighting System Technology (LST) seminars for the coming year. Each seminar will focus on the ways LST can increase efficiency and enhance design in a specific lighting environment.

Currently scheduled for 2003 are: Energy Efficient Lighting for Educational Facilities, February 10-12; Energy Efficient Lighting for Retail Spaces, June 2-4; and Energy Efficient Lighting for Commercial Offices, October 20-22. All of the seminars will be held at the Lightolier TechCenter in Fall River, MA and are accredited by both the American Lighting Association (ALA) and the American Institute of Architects (AIA).

The registration fee for each seminar is \$250. For more information, call Earl R. Print, LC, director of sales development and lighting education at (508) 646-3103 or email eprint@genlyte.com.

NY PROJECT SHOWCASES ENERGY-EFFICIENT LIGHTING FOR THE HOME

In an effort to reach home builders and manufacturers and distributors of energy-efficient residential lighting products, researchers from the Lighting Research Center (LRC) have joined with Belmonte Builders in Clifton Park, NY to demonstrate energy-efficient residential lighting. The project, sponsored by the U.S. Environmental Protection Agency and Energy Star, will promote energy-efficient lighting in new residential construction over the next three years.

"We've done the lighting design at one home in Saratoga, NY," said Patricia Rizzo, project manager for the LRC. "It opened as part of a showcase of 12 homes in Saratoga County on September 28. In our demonstration house, posters describe each energy-efficient product used, and we're asking people to fill out questionnaires to see how they react to the products." Many of the fixtures, ballasts, lamps and controls were donated by manufacturers, including Alkco, Decotex, Dreamscape, Lightolier, Prescolite, Seagull, Westinghouse, The Watt Stopper, Lutron, Advance Transformer, Osram Sylvania, GE Lighting, Kichler and Bartco.

According to Rizzo, the project is part of a larger study, which will assess the supply and demand for energy-efficient products as well as consumers' responses to these products in residential settings. A workshop was conducted in November by the LRC for builders and manufacturers on energy-efficient lighting for new construction. For more information, contact Patricia Rizzo at rizzop@rpi.edu.

ENERGY SECRETARY OPENS SOLAR VILLAGE

On September 26, Energy Secretary Spencer Abraham officially opened the first Solar Decathlon on the National Mall. The Solar Decathlon, which ran until October 5, featured a Solar Village of 14 solar-powered, highly energy-efficient homes that combined aesthetics and modern conveniences with maximum energy production and efficiency and incorporated state-of-the-art energy efficiency technologies. The 10-day competition was kicked off with a ribbon cutting ceremony, during which Abraham congratulated the participating university teams for their creative labor.

Open to the public, the Solar Decathlon was launched with the long-term objective of educating architecture and engineering students on solar-powered, energy-efficient designs; homeowners on related technologies available for the home today; and the American public on the importance of investing in renewable energy and energy-efficiency technologies to the nation's energy security. "We hope that the Solar Decathlon will inspire those who tour these homes to think differently about the energy they use, to learn how to use less energy than they do now or to learn how to generate their own power from the sun," said Secretary Abraham. "Renewable energy is here to stay. It's real. And its future is bright."

In addition to the Department of Energy (DOE), program sponsors included BP Solar, The Home Depot, EDS, the American Institute of Architects (AIA) and DOE's National Renewable Laboratory (NREL). For more information, visit www.solardecathlon.org.

COMPANIES EXPAND AND OPEN FOR BUSINESS

Kling, formerly Kling Lindquist, has announced the acquisition of a facility at 2300 Ionic Street in Philadelphia for the new home of Kling Interiors and the opening of a new office at 333 Fayetteville Street Mall, Suite 1150, Raleigh, NC. To contact the Raleigh office, phone (919) 334-3111 or fax (919) 334-3122. For more information, visit www.kling.us.

Optical Filter Source, LLC was launched on October 1. Founded by Frank Calcagni, formerly optics sales manager for High End Systems, Optical Filter Source specializes in dichroic and mirror coatings for the entertainment and architectural markets. To contact the company, phone (512) 248-0605 or fax (512) 248-8839.

ON THE MOVE ...

Ross De Alessi Lighting Design has relocated to 3313 West McGraw Street, Seattle, WA 98199. To contact the firm, phone (206) 441-0870, fax (206) 441-9926 or visit www.dealessi.com.

Entertainment Lighting Services (ELS), a Los Angeles-based lighting, rigging and staging company, is relocating to a 70,000-sq.-ft. facility. ELS can be contacted at 11440 Sheldon Street, Sun Valley, CA 91352-1121; phone (818) 769-9800, fax (818) 769-2100, info@elsnoho.com, www.elslights.com.

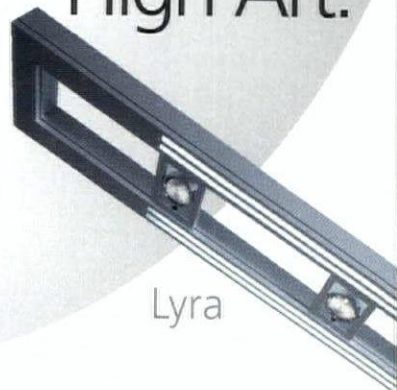

Ted Mather Lighting Design has relocated to 1650 Broadway, Suite 405, New York, NY 10019. To contact the firm, phone (212) 977-2611, fax (212) 820-9765 or email ted.mather@verizon.net.

555 Design Fabrication Management has moved its corporate home to 401 S. Western Boulevard, Chicago, IL 60609; phone (773) 869-0555, fax (773) 376-0555, www.555.com.

New York State Energy Research and Development Authority (NYSERDA) has moved its Albany office to 17 Columbia Circle, Albany, NY 12203-6399; phone (866) NYSERDA, (518) 862-1090, fax (518) 862-1091, www.nysesda.org.

Strategic management consulting firm **Design Management Co.** has moved from San Francisco to New York City. Its offices are now located at 110 Bennett Avenue, Suite 3A, New York, NY 10033. They can be reached at (212) 928-7511 or lloyd@designmanagementcompany.com.

...the future of light

Royal Philips Electronics has appointed **Erik Bouts** president and CEO of the North American division of Philips Lighting Co.

Thomas O'Rourke has joined SPI Group as eastern regional sales manager.

JJI subsidiary, Specialty Lighting, has named **Gregory D. Carpenter** VP, general manager.

Rochelle Kimball has joined Hydrel as market development manager.

Claas Ernst has joined Pixon, formerly Bright Lighting, as general manager of European operations.

Flying Pig Systems has appointed **Richard Mead** product manager.

Universal Lighting Technologies has named **Allen Middleton** Canadian OEM regional sales manager.

Ginger has appointed **William P. Barnett** VP of sales for the eastern region.

Willie Sutton has been appointed VP of sales for UltraWatt.

Incon Lighting has named **Scott Brown** president and **Kevan G. Enger** director of marketing.

Brian J. Keefer has joined the Los Angeles office of Horton Lees Brogden Lighting.

Eva Behrendt has joined Lightfair International as trade show manager. She can be contacted at (404) 220-2218 or evab@lightfair.com. **Tiffany Wiederhold** has been promoted to assistant manager, conference and marketing; phone (404) 22-2205, email tiffanyw@lightfair.com.

Mario Gallo, LC has joined A.L.P. Lighting Components as director of product engineering.

Howard Industries—Ballast Products Division has named **John Clancy** western regional manager; **Chris Tullos**, southwest regional manager; and **Kevin Hughes**, midwestern regional manager. **Kevin Hughes** continues as southeastern regional manager.

Icon Architectural Lighting Systems has named **John S. Marshall** president.

The Illuminating Engineering Society of North America (IESNA) presented the Distinguished Service Award to lighting designer **Joseph M. "Jody" Good, III, LC, IESNA** on August 5 during its Annual Conference in Salt Lake City.

Catalina Lighting Inc. has appointed **Robert Varakian** president and CEO and **Stephen G. Marble** CFO.

THE ACE.al AWARD 2002 WINNERS

First Annual
Architects Choice for
Excellence Awards.

Recognizing Excellence in
Lighting Products and
Manufacturers.

VALUE
DURABILITY
CUSTOMER SERVICE
DESIGN

These are the manufacturers
that have provided
architects and lighting designers
and their projects with the best
products and services.

Letter from the Publisher

It is with great pleasure that we announce the winners of *Architectural Lighting* magazine's first annual Architects Choice for Excellence Awards. The ACE.al Awards recognize lighting manufacturers who have provided you and your projects with the best products and services.

We salute these industry leaders, as voted by the readers of *Architectural Lighting*, for their commitment to product excellence in the areas of value, durability, customer service, and design. In particular, we'd like to highlight Lightolier, voted the number-one manufacturer in this very competitive field. With over 100 years of electrical lighting history, Lightolier brings a breadth of product and a depth of experience to a variety of indoor architectural environments.

Innovation, customer collaboration, and top-notch performance are trademarks of all the winners as they strive to meet and exceed design expectations, cost criteria, and demanding deadlines.

And to those who took the time to select this fine group of winners, we extend our appreciation. The ACE.al Award winners will be available on our Web site—www.lightforum.com—throughout the year to provide a valuable resource for you. After all, they showcase the best in the business.

Industry Insight

Lightolier

"Everything we see, most of what we do, and much of what we feel is touched by light. Managing the effects and the cost of light is what great lighting is all about. For almost 100 years, Lightolier has been committed to great lighting, lighting that makes a difference for people and business," says Ken Mackenzie, director of marketing for Lightolier. "More than just hardware, Lightolier delivers the magic and impact of lighting. How we accomplish this is with a unique blend of people, expertise, and a drive for excellence and innovation."

A major innovator throughout the last century of electric light, Lightolier offers a breadth of products unrivaled in the industry, including downlighting, traditional recessed fluorescent, track lighting, emergency and safety lighting systems, architectural decorative lighting, indirect fluorescent systems, and lighting controls for residential and commercial applications. This broad line of products may be specified in a wide variety of interior architectural environments, including commercial, light commercial, hospitality, retail, and residential markets. "New product design and development is the lifeblood of this company," says Ken Mackenzie, director of marketing for Lightolier. "It is our design philosophy to do it first, do it better. We are always looking to improve the state-of-the-art through innovation, technology, superior performance, and value."

Integral to Lightolier's design and product success is education and training. Dedicated to the art and science of lighting, Lightolier does much to raise the level of lighting awareness among contractors, specifiers, architects, students, and end-users alike. Lightolier was the first luminaire manufacturer to offer—free-of-charge—comprehensive lighting training via the Internet. Lightolier's "Lessons in Lighting" education course offers 22 on-line "modules", which provide the fundamentals of light and vision, luminaires, equipment, ballasts and lamps, and lighting design and application in a simple, self-study format. Members of ALA and AIA who complete the course receive continuing education points for sustaining membership in their respective organizations. "Thousands of people have taken Lessons in Lighting," says Mackenzie. "College students, industry professionals—the more people we reach the more we spread the word about just how incredible lighting can be."

In addition Lightolier offers a number of advanced LST or "Luminaire Systems Technology" courses at its Fall River, Massachusetts headquarters. These intensive two- to three-day workshops focus on specific application training such as lighting retail, educational, or office environments. "These courses utilize our Fall River training facilities, including Lightolier's 5,000-square-foot TechCenter," says Mackenzie, "The TechCenter is a wonderful laboratory for seeing and comparing lighting alternatives in real-world settings." □

B-K Lighting

"There is no single thing we do that results in our overall success. As always, we have to produce a quality product, provide excellent service levels, make it easy to do business with, understand our customer's needs, respond, innovate, educate, add value, and do dozens of other things right just to be in the game. Fortunately, we do all of these things well," says Ronald Naus, vice president of sales and marketing of B-K Lighting.

Since 1986, B-K Lighting has been dedicated to providing the lighting industry with the highest quality, most innovative, and fairly priced outdoor lighting fixtures available. In recent years, B-K Lighting products have been featured in such prominent venues as The Seattle Opera House, Four Season's Hotels, Disney World and Wild Animal Kingdom in Orlando, San Francisco's Embarcadero, and The Bellagio in Las Vegas. When product design and durability are key design elements, residential and architectural installations demand B-K Lighting.

B-K Lighting continues to strive for excellence in both design and quality, utilizing the latest in computer-controlled equipment to produce machined aluminum, brass, and stainless steel products to exacting standards. This type of precision manufacturing ensures fixtures have quality and craftsmanship unequalled in the lighting industry.

In 2002, B-K Lighting dramatically expanded Precision2, an award-winning line of recessed in-grade products. Low Voltage, Par Halogen, Compact Fluorescent, High Pressure Sodium, and Metal Halide sources are now available in a diminutive seven-inch diameter housing.

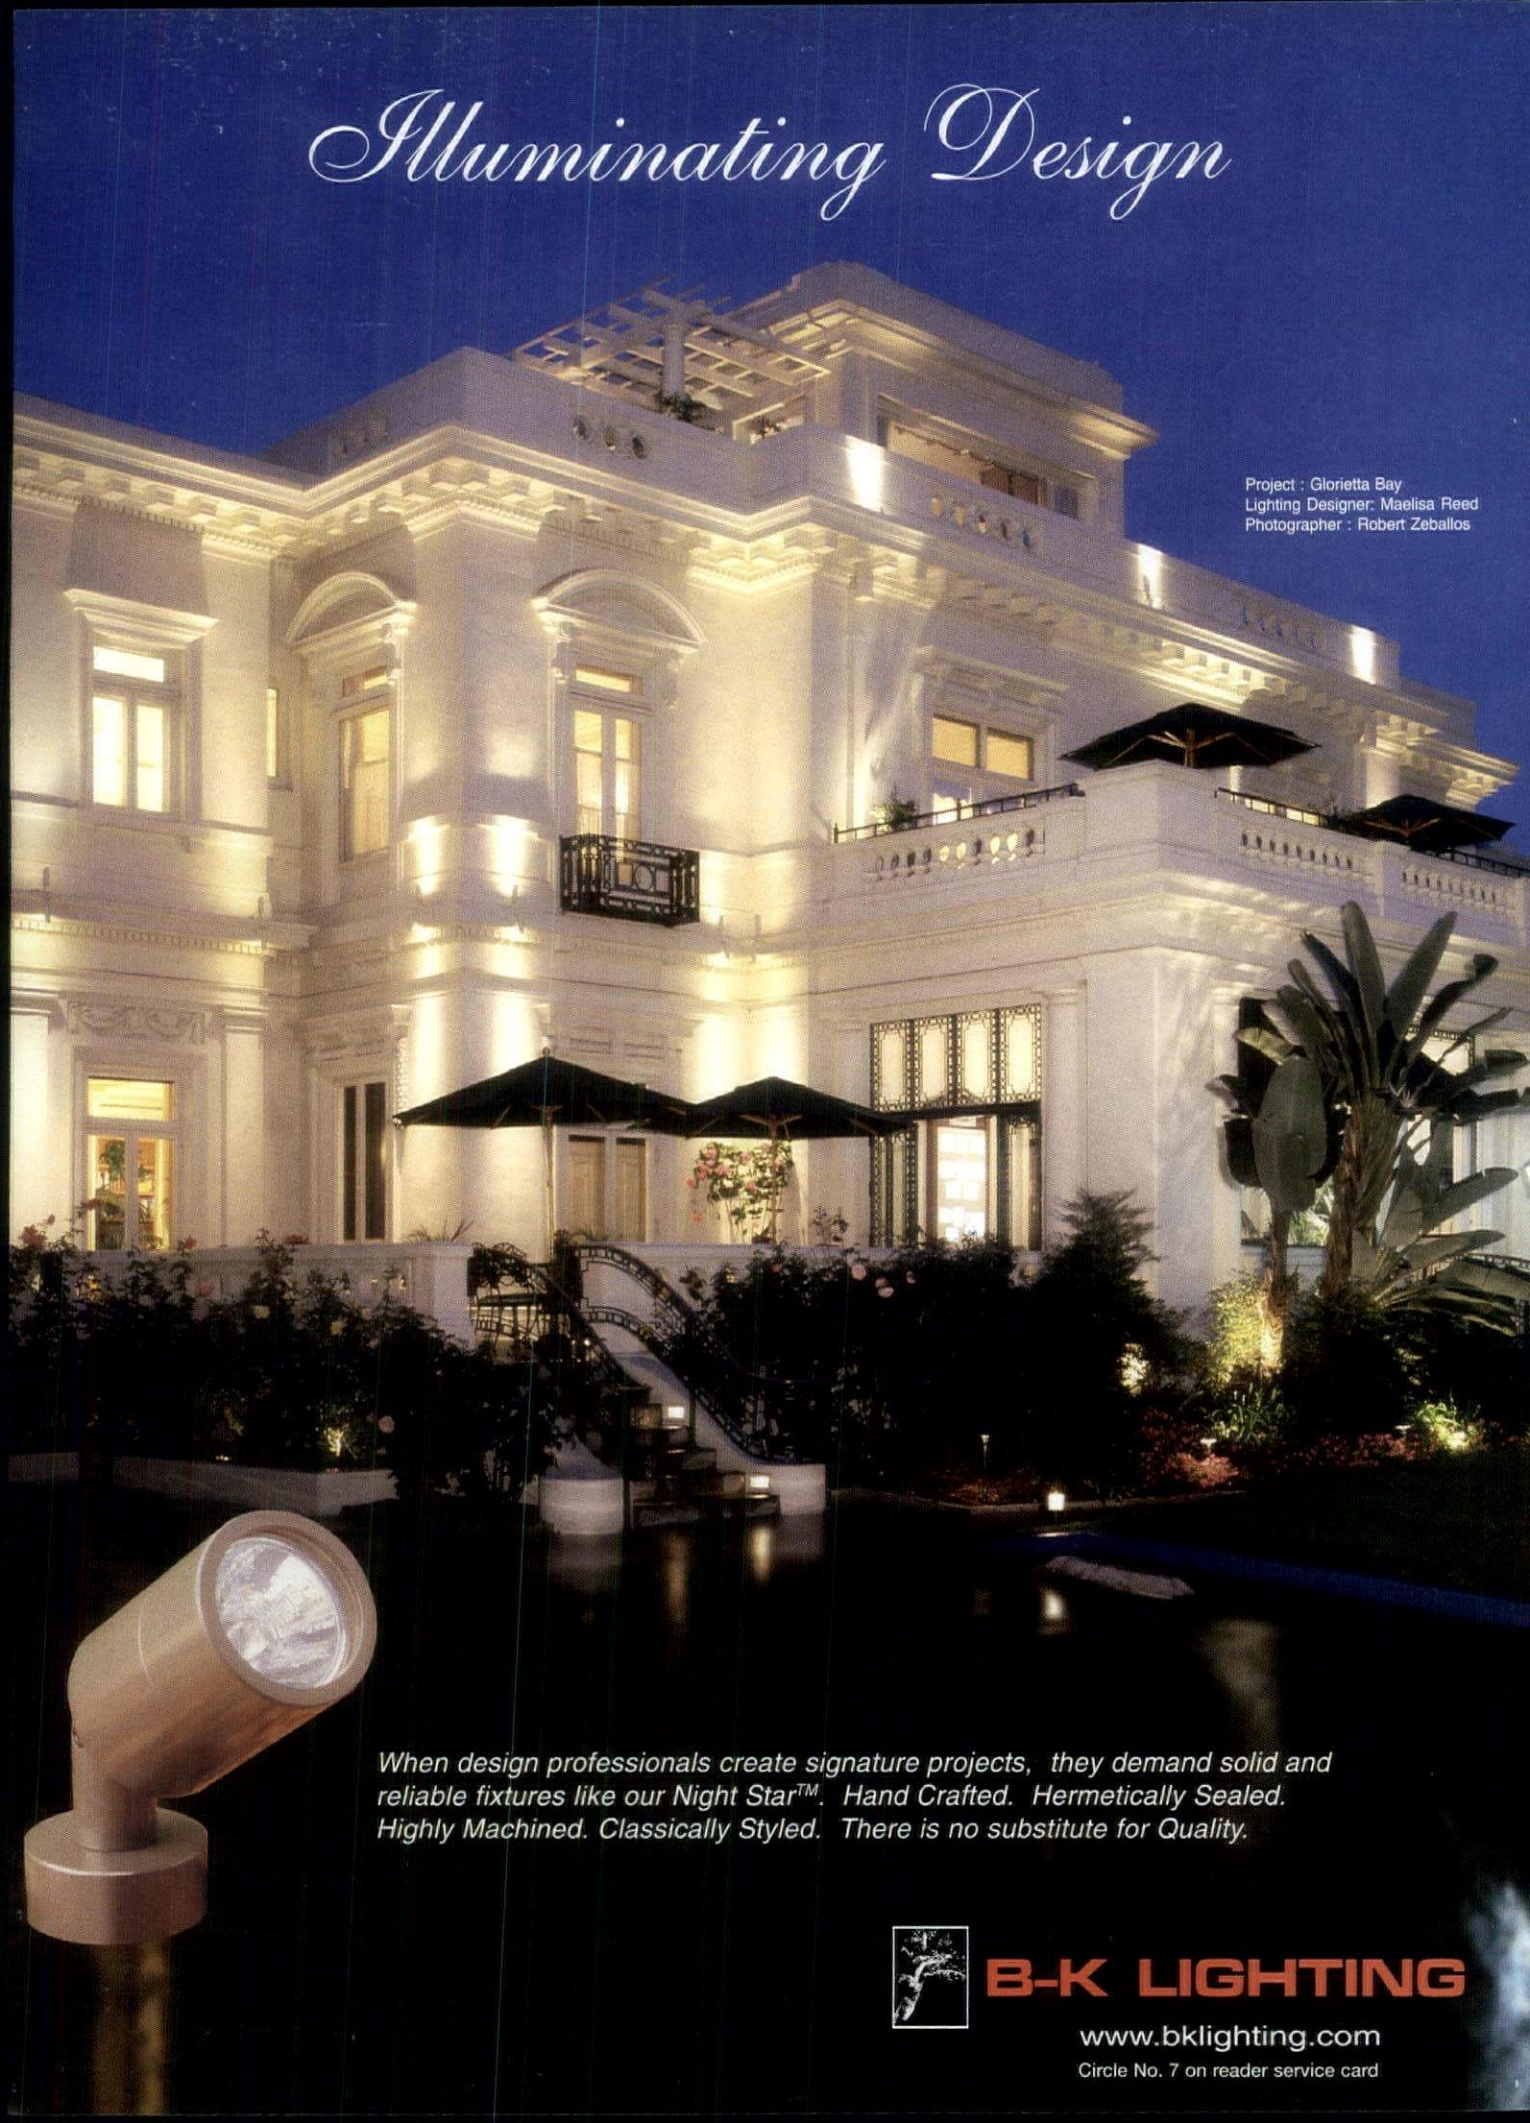

"Innovation drives our business," says Ronald Naus, vice president of sales and marketing for B-K Lighting. "From smaller sources like the T-4 Metal Halide lamp to opportunities from our customers to fabricate custom materials, much of what we do is at the forward edge of fixture design."

Service is not just a slogan at B-K Lighting, but a way of life. Even with the many finishes, options, and accessories available, delivery times compare to the best in the industry. "In a time when outdoor manufacturers measure lead times in terms of weeks, we ship within days," says Naus. "Where most manufacturers offer a few color options, our standard palette extends to well over 200 choices. You cannot possibly do these things and not be innovative." □

Quality, service, innovation, and value all add up to make B-K Lighting the number-one choice in outdoor architectural lighting.

Industry Insight

Cooper Lighting

Cooper Lighting is home to the SOURCE, a 35,000-square-foot, state-of-the-art training and education center. The company, who was the first in the industry to dedicate resources and a total corporate commitment to the advancement of lighting education with the opening of the SOURCE in 1991, has educated over 55,000 professionals and students. The facility is comprised of nine innovative real-life application areas (vignettes), seven showrooms, an auditorium, and a unique Fundamentals/Technology Room.

The leading manufacturer of track and recessed lighting in North America, Cooper Lighting is also one of the fastest growing lighting fixture manufacturers of incandescent, fluorescent, and H.I.D. luminaires. Cooper Lighting's family of strong brand name lighting products—representing some of the most innovative products in the market—are used in numerous applications in the finest residential, retail, commercial, and institutional facilities worldwide. Cooper Lighting's intensive market research and innovative product development creates high quality, versatile products, while not sacrificing good value—from the Lumière Monaco Product line, utilizing new T4 and T6 metal halide lamps and offering adjustable light distribution in a very small outdoor accent luminaire, to the Metalux brand, which demonstrates the value-driven approach to contemporary lighting with the recent introduction of the BASIX architectural striplight series, an inexpensive fluorescent strip with unique optical elements that brings an affordable solution and a new sense of style to today's workplace.

Continuously developing innovative lighting solutions to match today's growing trends, such as energy legislation and sustainable design issues, Cooper Lighting introduced over 50 new products this year, representing significant developments in the lighting industry. An energy efficient, flexible, track lampholder by Halo incorporates T4 Metal Halide lamping, a very small size and precise adjustable beam control that allows specifiers to select an energy saving reliable lampholder for a multitude of applications. The new McGraw-Edison Vision Series features the industry's first and only wall mounted, IES full cut off classification outdoor luminaire incorporating the new 57 and 70 CFL, offering an energy efficient approach to quality egress illumination.

"Cooper Lighting's goal is to offer a comprehensive line of lighting products which enable our specifiers to turn to one supplier for many of their lighting needs," says Lance Bennett, director of specification and architectural product sales for Cooper Lighting. "By offering all our brands, we are able to introduce products in a consistent format that complement each others designs, offer wide access to our product information, and most importantly, provide a consistent level of support to our customers." □

Industry Insight

elliptipar

“elliptipar’s mission is to be at the leading edge of the lighting industry by developing unique products for unserved or underserved markets or applications. The products we build are to be mechanically and electrically superior and aesthetically appropriate,” says Sylvan R. Shemitz, FIES and CEO of elliptipar. “Our goal is to achieve profitable growth, both intellectually and financially, and to have fun.”

High-performance asymmetric lighting is elliptipar’s niche and the company is dedicated to its further development. “It is the continuing support of the specifying community that has enabled elliptipar to innovate and grow,” says company CEO, Sy Shemitz, citing elliptipar’s five-point policy taken from the company’s first catalog published in 1977, as the backbone of the company’s continuing success.

1. Business is filled with daily frustrations. We will make every effort to meet or better each delivery commitment.
2. We are not auctioneers. We will maintain a clearly defined and stated price policy.
3. Buildings are usually built to last. Our lighting fixtures, like buildings, will be designed for longevity and easy maintenance.
4. Energy costs far exceed initial cost in the life of lighting products. Our goal will be to obtain the lowest life-cycle costs.
5. Our prices are not inflated to include free engineering or layout services. We recommend the use of qualified professionals. We will furnish performance data to them.

elliptipar’s credo demands that every product the company builds be energy efficient, safe for its intended use, and aimed at that part of the market that expects and insists on top performance. elliptipar’s employees know that no product is to be sent out of their doors that fails to fulfill the company’s quality standards.

Sy Shemitz believes that the only reason to do something that has been done before is that there is no better way. Shemitz is fond of saying, “We will never intentionally copy another’s product design. How I wish that others in our industry shared our credo.”

elliptipar’s factory produces a wide range of distinctively styled indoor and outdoor asymmetric reflectors for halogen, fluorescent, and metal halide sources. The company is proud to make the tools that have brought to light so many exciting projects, worldwide. □

Engineered Lighting Products

Since its solution-based inception in 1985, Engineered Lighting Products has never wavered from its problem-solving dedication in new fixture development. The company continues to utilize new technology for developing more effective and efficient luminaires. Over the years, ELP has been granted several U.S. patents because of its innovative fixture designs that provide excellent solutions for today's lighting problems. ELP manufactures superior interior and exterior lighting fixtures for use in commercial and residential installations. The majority of luminaires use efficient, high-color rendering fluorescent and metal halide lamps and are designed to light a room or surface without glare. With ELP's numerous lamping configurations, designers have tremendous control over light levels on their projects.

ELP's on-staff lighting professionals work with engineers and designers on lighting design, layout, and technical problems, solving problems or creating new products. "When we notice a trend or a void in the market, we see if there is a solution," says Toni Swarens, president and CEO of Engineered Lighting Products. "It may then become a new fixture for our product line." A perfect example of this innovation is ELP's unique "Hole in the Ceiling" products, downlights that look like custom-made plaster light niches. Made with GRG (fiberglass reinforced gypsum) castings, the "Hole-In-The-Ceiling" product line was developed in response to specifiers' requests for a downlight component to the company's "Hole-in-the-Wall" series. ELP is also leading the trend in video-conferencing lighting fixtures with its new VT series. These recessed indirect fixtures provide even, vertical illumination in three directions, comfortably illuminating the participants involved in video-conferencing while providing low-level lighting on the screen or monitor wall. □

Industry Insight

"In addition to producing quality fixtures that will last and look good for years to come, we place a great deal of importance on customer service, innovation, and creativity," says Toni Swarens, president and CEO of Engineered Lighting Products.

Industry Insight

Fiberstars, Inc.

"Fiberstars has built its market-leading share of the fiber optic lighting business with superior products, which feature custom optics designed to optimize light output through fibers," says Dave Ruckert, president and CEO of Fiberstars. "The fiber we use is either the highest grade of Mitsubishi stranded ESKA—a grade exclusive to Fiberstars—or Fiberstars' own large core fiber, which sets the industry standard for clarity, ease of installation and longevity."

Fiberstars has been a research and development-focused company since its inception, having developed fiber optic lighting products for a wide range of applications, from neon-replacement systems, landscape, and fountain and pool lighting to commercial accent lighting, downlighting, building exterior lighting, and case and cabinet lighting. The company's special applications division is internationally known for its work in animated signage, special effects, and sophisticated computer-controlled systems. These special systems can be found at the top hotels in Las Vegas and the nation's leading themed-entertainment attractions. From the award-winning Sony Playstation store at the Metreon Complex in San Francisco to the world's largest Christmas tree at the Trump Tower in New York and the ancient Church of the Holy Sepulcher in Jerusalem, the most prestigious and demanding projects in the world depend on the products and expertise of Fiberstars.

While Fiberstars has consistently led the industry in product development, by far the most significant breakthrough is the recent development of Fiberstars EFO™, Energy-efficient Fiber Optics. This patented system represents an entirely new way of transferring light from the source to the fiber optic cables, resulting in energy efficiency that far surpasses incandescent and popular low-voltage halogen systems and, in certain applications, rivals compact fluorescent systems. The "engine" of the EFO system is a compound parabolic collector known as CPC Optics™, a patented optical system that radically changes the way fiber optic lighting works and performs.

"Fiber optics will find an increasing market in accent and spot lighting. The new Fiberstars EFO systems couple patented inventions in both optics and fiber cables to create one of the world's most efficient lighting products," says Dave Ruckert, president and CEO of Fiberstars. "Fiberstars EFO delivers between 30 and 60 lumens per watt, depending upon how it is configured. Incandescent and halogen sources typically deliver between 12 and 15 lumens per watt. Plus, projects get the significant advantages of no UV or heat emanating from the fixtures, no electricity traveling to the fixtures, and easier, centralized maintenance. □

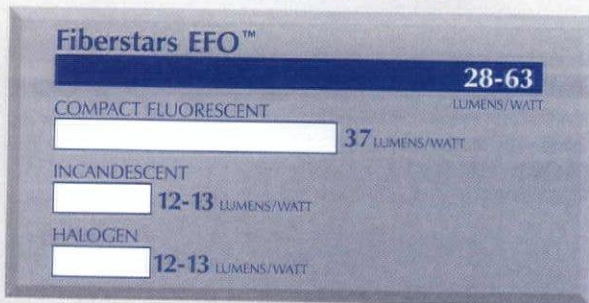

An ever-changing, highly colorful representation of the Northern Lights in Las Vegas; EFO brings jewelry to life at some of the country's finest stores; Energy-efficient EFO is a great alternative to traditional accent and downlighting.

TECHNOLOGY BREAKTHROUGH: The Look of Low Voltage at a Fraction of the Energy.

Energy issues can keep designers from specifying the lighting they want. Take halogen fixtures, for example. They're small, attractive and produce focused accent and downlighting. But because halogen isn't energy efficient, compact fluorescent often gets specified instead, even when it's inappropriate.

Enter Fiberstars EFO™, a major breakthrough in fiber optic lighting combining energy efficiency with the small fixture size and focused distribution of halogen. Our new, six-fixture EFO downlighting system delivers MR16-like performance using a single 68-watt lamp instead of six 50-watt lamps.

DELIVERED LUMENS PER WATT

Independent tests show that a single 75-watt Fiberstars EFO™ system can deliver MR16-like performance from a fraction of the energy.

It's all made possible by CPC Optics™, a patented system that transmits light to fiber in an entirely new way, redefining fiber optic lighting performance. There's still no local heat, electricity or harmful U.V. And because one lamp powers six fixtures, EFO is exceptionally easy to install and maintain.

It's a breakthrough so impressive it's hard to believe. So don't take our word for it—ask your Fiberstars representative for a demonstration.

Fiberstars EFO™ is an energy-efficient solution for highlighting and area downlighting in offices and other commercial applications.

Industry Insight

Hadco

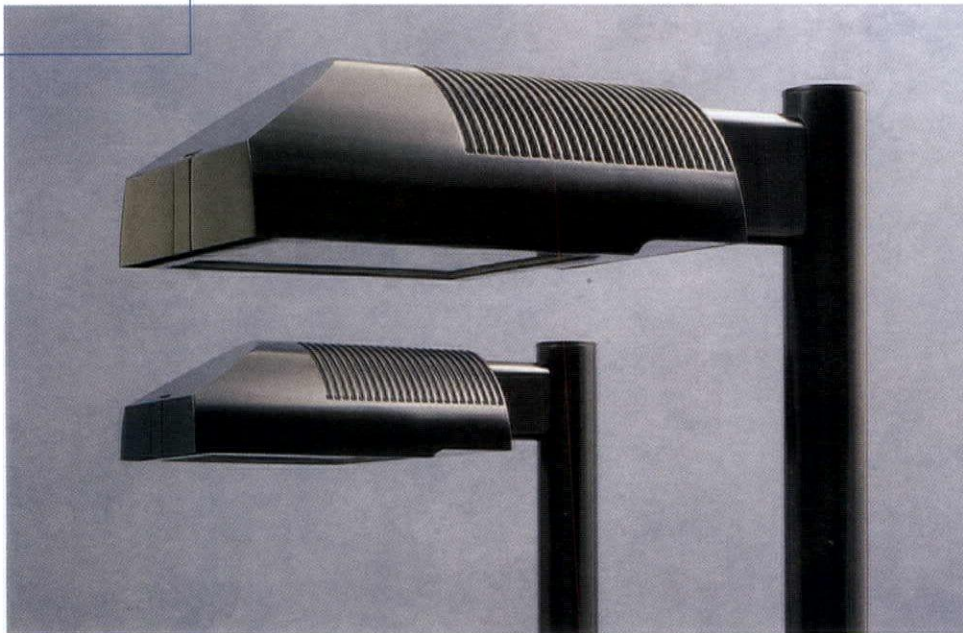

What is the key to Hadco's success? "Innovation," says Lew Waltz, Hadco's vice president of landscape. "We really focus on leadership capabilities. Hadco is always thinking ahead and looking at what can be brought out next to improve the industry," he says. Next on the docket for Hadco is a focus on light emitting diodes (LEDs) because of their efficiency and longevity.

Since 1948, Hadco Lighting has been working to create a safe, secure, and aesthetically pleasing environment by offering the most up-to-date technology in architectural, landscape, and street and area exterior lighting. The company's founder worked with Walt Disney himself to light Disneyland, and today Hadco continues the tradition with its work on Epcot and other theme parks. High-end private estates, such as the Biltmore House, also feature Hadco fixtures, as do many well-known courtyard hotels, college campuses, and municipal utility systems. With an extensive product catalog and comprehensive list of services, including an in-house engineering department, Web site with spec sheets and applications, and installation support, Hadco has become the leading landscape lighting manufacturer in North America.

Hadco's focus on training and the sharing of knowledge is vital to the company's success. A quarterly newsletter keeps contractors up-to-date on technical advancements, and thorough nationwide training classes give them a first-hand look at how new products can be used. Classes are held regularly in Hadco's Littlestown, Pennsylvania headquarters and Texas facilities, and training seminars in the field take place regularly. More than 800 total distributor personnel and contractors attend Hadco's classes each year. Constant feedback from seminar attendees and industry contractors keeps Hadco moving ahead. "We try to uncover what they need and what issues they run into so that we can find an answer," says Lew Waltz, Hadco's vice president of landscape. "Because of that interaction we have been able to develop an entire catalog of products that ship in 24 hours."

Each product in Hadco's catalog is manufactured with great attention to detail—right down to the company's simplest path lighting system. Every model is designed to provide a specific pattern of light, meet design criteria of the engineering community, and withstand the harshest of elements. The catalog's most recent addition is a 20-watt halogen PAR36 lamp. Lasting four times as long as the industry's 25-watt standard and with a third more candle power, the PAR36 raises the bar for landscape flood lighting even higher. □

Hadco lighting products can enhance landscaping with distinctive elegance, while improving security and illumination in commercial and retail applications.

Industry Insight

Kim Lighting

Innovation and customer support are the distinguishing hallmarks of the Kim brand. Kim artfully blends state-of-the-art design, uncompromising quality, and exceptional performance with a singular focus on customer needs. Kim backs its leading-edge products with support from initial application through in-service life to ensure that value produced is fully realized.

Kim Lighting has been creating innovative outdoor lighting solutions since 1933. From the beginning, it has taken a lighting design perspective toward product development. Today, this approach remains intact and is the core of the company's focus. New products are developed to solve lighting needs and to provide efficient and attractive solutions.

Kim's approach to design has evolved into a special "Theory of Relativity." This defines the relationship of luminaires to the position they occupy in the site environment. Area lighting is developed with an entirely different set of design and performance criteria than pedestrian-level luminaires, which are different from criteria used for wall-mounted products. This approach addresses performance requirements, physical scale, detailing, and the perspective from which products are viewed when installed in real world environments. The process also recognizes that outdoor area lighting is seen most often when it is not functional—during the day. This daylight visibility means Kim products must be attractive when they are not in use and perform well when the sun goes down. This sensitivity to product visibility, placement, and function is a Kim hallmark. The integration of design, from site/area lighting to mounting intimate with architectural surfaces, produces a unification that appears well-considered to site occupants. For example, the Archetype[®], for site/area and roadway illumination, is complimented by a smaller companion design for pedestrian areas at lower mounting heights.

For illuminating building surfaces and site features, landscape accents and AFL floodlights offer a wide range of options to adapt to virtually any need. Each product provides a distinct function, while utilizing shared design detailing, scaled to reflect specific locations in the site environment.

Every Kim product is produced to last with premium materials, finished in-house in Super TGIC powder coat, and supervised through a program that is audited to ISO-9001:2000 standards. While several others have copied Kim product appearances, they fail to capture the attention to detail, performance, quality, and spirit that comes from being the originator of ideas. □

The Archetype available in the AR (large) or SAR (small); AFL Architectural Floodlight; New for 2002 EL180 Series Path Lights.

Superior, Trouble-Free Landscape Lighting...

... means fixtures engineered for easy installation and maintenance, and no call-backs.

It means innovative fixtures with top-loading lamping, few moving parts, and magnificent designs like our new contemporary path lighting series.

It means broad, complete lines of fixtures manufactured from a wide variety of materials to suit any environment ... diecast brass, aluminum, composite materials and our new copper and stainless steel lines.

HADCO[®]
GENLYTE THOMAS GROUP LLC

And, it means we will ship any fixture in our NightLife[®] catalog within 24-hours ... now isn't that enlightening.

For a FREE NightLife catalog call 717-359-7131, fax 717-359-9289, or visit us at www.hadcolighting.com.

Lighting, Inc.

Top 20 Manufacturer

Industry Insight

Leviton Manufacturing Co., Inc.

For over nine decades, Leviton has tracked the demands of the lighting community. The company's first product, a gas lamp mantle, made its debut in 1906. When lighting upgraded to electricity, so did Leviton. "Today we see many instances where the demand for control goes far beyond the light switch," says Tom Leonard, director of marketing for Leviton. "Wherever future technology goes, we'll be there, turning the lights on."

It's no wonder that Leviton Manufacturing Co. is the largest wiring device manufacturer in North America. With an extensive product catalog that includes receptacles, GFCIs, surge protective products, lighting controls, home automation, and connection products, as well as child protection and easy-to-use devices for senior citizens, almost anyone with a lighting need can find a solution at Leviton. But the real backbone to Leviton's success is an innovative philosophy that has guided the company since it was founded by Isidore Leviton in 1906: integration. While many manufacturers divide their services and products into architectural, theatrical, and energy management branches, Leviton houses all within one common facility and under one company name. The collaboration from in-house experts in all three divisions breeds a more complete, more comprehensive line of products.

One of Leviton's newest products, the Dimension D8000, is designed specifically with integration in mind, and can be tailored for the simplest commercial application or the most complex multi-use facility. The D8000 recently installed in the Minneapolis Convention Center is one of Leviton's largest lighting control system applications ever. "Because of the flexibility of this lighting system, the center can be better customized for all types of events, from large technical conferences to auto shows—and everything in between" says Tom Leonard, director of marketing for Leviton's Lighting Control Division. Lighting for all of the center's spaces, including the intimate meeting rooms, theatrical presentation areas, and exhibit halls, are easily managed through one integrated network. Also based on the integration philosophy is Leviton's new Centura fluorescent energy management system for commercial properties. The system allows individual employees to adjust lighting levels to fit their needs, and benefits owners because it conserves energy; Centura makes use of "daylight harvesting" technology that considers sunlight levels in its calculation of how much light to emit.

Headquartered in Little Neck, New York, Leviton has 22 manufacturing facilities across North America, and offers training and education seminars regularly. The Leviton family includes the Leviton Voice & Data Division, Leviton Lighting Controls Division, American Insulated Wire, and Electricord. □

The state-of-the-art lighting control system at the newly expanded Minneapolis Convention Center.

Leviton's new advanced lighting control system puts the competition in the Dark Ages.

Feature	Leviton D3208	Brand "G"
Max. no. of scenes, zone-controller accessible	32	4
Max. no. of linkable zone controllers	31	8
Max no. of zones per system	248	48
Max no. of zones controlled from one zone controller	248	6
Max. no. of control points/system	100	24
Scheduled scene changes	64	0
Astronomical clock	yes	none

With Leviton's new D3208 Multizone Dimmer/Controller, architectural lighting control systems enter the Age of Enlightenment. It's that far ahead of the competition! With the power and capability once found only in "big box" cabinet systems, the D3208 offers such progressive features as join/separate functions, astronomical clock for event scheduling, PC interface and unprecedented networking capability that can link up to 31 units together. And where other units kept you in the dark, the D3208 keeps you informed,

spelling out zone, channel and programming information in plain English on its bright 2-line, 32-character display. What's more, on-screen wizards guide you step-by-step through set-up functions. Whether commercial or the most demanding residential application, the D3208 brings lighting control to a new age of power, convenience and capability. ■ To learn more, visit www.Leviton.com/d3200.

Lutron Electronics

Lutron integrated solutions can positively influence LEEDS Green Building Rating Systems credits in optimizing energy performance. "Lutron systems optimize light output whenever electric lights are turned on. The Lutron systems ensure that electric light is used to best supplement available daylight, enhancing lighting quality while reducing overall electricity use," says Tom Myers, Lutron market development manager. "Buildings can also use Lutron shading solutions in design for daylight and views."

Lutron Electronics is the world's leading manufacturer of innovative lighting controls for virtually any commercial or residential project. In keeping with its leadership position, Lutron is working to optimize the role of lighting control in enhancing the performance of commercial buildings. The result is an integrated solution using lighting control products that work to take greatest advantage of natural light, enhance productivity and morale, and improve overall efficiency throughout the building.

One of Lutron's latest product breakthroughs is the 1% Hi-lume[®] Fluorescent Dimming Ballasts for compact fluorescent lamps. Energy-efficient fluorescent lamps are dominant in commercial facilities, but traditionally, incandescent lamps are used in areas requiring very low, precise levels of light. Lutron's new 1% Hi-lume Ballasts feature high frequency electronics that save electricity as lamps are dimmed; a critical factor in meeting strict, new energy codes. The new ballasts' low profile and high performance allow efficient compact fluorescent fixtures to be used in place of incandescent downlights in meeting rooms, ballrooms, and auditoriums.

Another method of creating more efficient buildings is to decrease the building's dependence on electric light. Utilize a Lutron lighting control system such as the GRAFIK 6000, and incorporate control of Lutron's Sivoia (Ultra-Quiet Motorized Shade and Drapery System) to take advantage of available natural light, improve aesthetics, and boost energy savings. Existing construction can also realize efficient lighting control with Lutron's RadioTouch. RadioTouch offers integrated, wireless remote control of lighting, audiovisual equipment, and motorized window shades from anywhere in a room. And, since it is wireless, RadioTouch can be retrofitted into any space without tearing apart walls, and can be reconfigured or expanded at any time to accommodate the changing needs of a space.

Smarter, healthier, more efficient buildings are essential for the future. Lutron is dedicated to the continued proliferation of sustainable, efficient architecture, and to making lighting control a primary means of achieving this goal. □

Lutron's commercial dimming products will enhance employee productivity and save energy.

1% Dimming for Compact Fluorescents

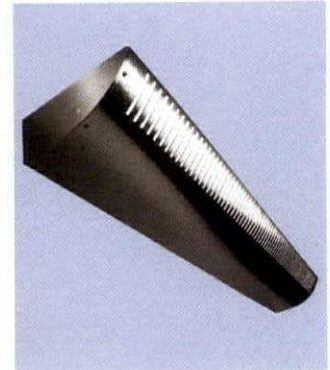

The rules have changed. Yesterday, creating an inviting visual environment meant using incandescent sources. Today, Lutron's Hi-Lume[®] 1% dimming technology lets you create ambiance in architectural lighting with energy-saving compact fluorescent lamps and Lutron lighting control systems.

Industry Insight

Prudential Lighting

"We strive to offer performance-based optical instruments, in architecturally interesting and relevant packages, to the market at prices that fit any project," says Jon Steele, marketing manager for Prudential Lighting. "We do this by making standard materials perform at their outer limits through rigorous engineering and design standards."

"With a standard catalog in excess of 100 unique products—with countless variations, we also have a strong heritage of modifications and pure custom designs," says Jon Steele, marketing manager for Prudential Lighting. "Lighting designers, architects, and interior designers have often found Prudential to be the best partner to collaborate with on custom interior fluorescent luminaires."

As the only manufacturer of linear fluorescent luminaires to offer six different finishes, Prudential brings diversity and aesthetics to almost any environment. Affordable and timely, the standard finishes available are brushed aluminum, stainless steel lines, stainless steel squares, stainless steel weaves, galvanized, and copper. "Our luminaires with unique metal finishes are designed to broaden a designer's palette," says Steele. "We provide options, instead of limitations, through a line of finishes that have been melded into adaptive architectural lighting solutions."

As an example of Prudential's commitment to optical excellence, the newly designed Super Cove lighting system offers a unique combination of advanced reflector design and three distinctive materials, pushing light further—at very low angles—with virtually no socket shadows or ceiling striations. "A photometric top performer, our new cove light is designed with enough horsepower to light rooms up to 15 feet wide from the walls, with enough control to do so at close proximity to the ceiling, while maintaining a four to one ceiling uniformity," says Steele.

Family-owned for four generations, Prudential is dedicated to customer service, with a passion for creativity and innovation. Looking to the future, Prudential will introduce a new 400+ page catalog, featuring a new brand and corporate identity in the first quarter of next year. □

Industry Insight

The Watt Stopper, Inc.

Dorene Maniccia, manager of market segment development for The Watt Stopper and developer of the guide says, "The *Lighting Control Best Practices Guide for Schools* helps ensure that the right combination of products are used to satisfy the control needs for today's schools and their occupants. The Watt Stopper's Best Practices Program essentially enables us to provide complete solutions for our customers."

Energy efficiency is a major consideration in design and architecture today. Controlling the lights helps save energy every day, and there are optimal lighting control solutions for every building. Whether it's retail, office space, warehouses, or schools, the right combination of lighting controls provides maximum energy savings, improved lighting quality, and comfort for occupants. But there are countless types of controls, and getting the right fit can seem overwhelming. For this reason, The Watt Stopper developed its Best Practices Program. The program provides application-specific design, specification, and installation guidance for lighting controls. Utilizing the Best Practices Program for specific applications helps users save energy and reduce operating costs, meet energy codes, optimize sustainable designs, and improve occupant comfort.

As part of the Best Practices Program, The Watt Stopper recently published *The Lighting Control Best Practice Guide for Schools*. Geared towards K-12 schools, the guide illustrates how lighting controls are effectively implemented for school spaces such as classrooms, gymnasiums, and exterior lighting. The Best Practice Guide includes detailed lighting control plans, installation notes, wiring diagrams, and equipment schedules for each type of application.

In the coming months, The Watt Stopper will publish *The Best Practice Guide for Commercial Buildings*. Copies of *The Lighting Control Best Practices Guide for Schools* are available by contacting The Watt Stopper at 800-879-8585 or at www.wattstopper.com.

The Watt Stopper, Inc. is a leading manufacturer of lighting control products for commercial buildings, schools, retail stores, and warehouses. The Watt Stopper's wide range of products provide buildings with the best control strategy for optimal energy savings, including indoor and outdoor occupancy sensors, daylighting controls, lighting control panels, plug load controls, and energy auditing tools. □

Watt Stopper lighting controls can help save energy in a wide variety of school applications. Information is available in *The Lighting Control Best Practice Guide for Schools*.

Think of it as a great big light bulb in the sky . . .

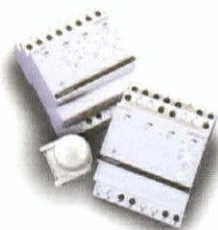

With LightSaver, The Watt Stopper's new daylighting controls, you can rely on the sun's abundant light to supplement or even replace your artificial lighting. It's a natural choice for saving energy, reducing demand, and shedding non-critical lighting loads.

Choose from continuous dimming or ON/OFF switching controls for interior lighting. And there's photosensitive control for exterior lighting, too. LightSaver

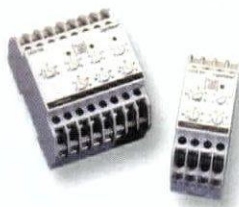

offers features that you won't find anywhere else, like multi-zone control and a wide range of user-adjustable settings. With simplified installation and configuration requirements, you'll be up and running in no time.

Just think, it's one light bulb you'll never have to replace.

Aromat

ELECTRONIC METAL HALIDE BALLASTS

"I should have bought Aromat Ballasts!"

Slim-Lite: 39W & 70W Multi-Voltage: 20W, 39W, 50W, 70W, 100W & 150W Mint: 20W & 39W Coming Soon: ?W

Saving a few cents on unproven ballasts isn't worth the headaches later on. Only **NAIS** brand Metal Halide Electronic Ballasts from Aromat have a **long history of "hyper-reliability"**. NAIS brand MHEB's have successfully operated lamps through many, many lamp life cycles. Other MHEB's have never even been through one entire lamp life cycle.

And remember, lamp company "approvals" only evaluate ballasts for short-term *lamp performance*, they do NOT guarantee the quality and reliability of the ballast itself. Only Aromat can claim a staggeringly **low 0.0063% failure rate** for over 600,000 units already installed all over North America.

Over **95% of North American OEMs specify Aromat as their sole supplier** for MHEB's and so should you. Having already developed MHEB's in all shapes and sizes for all types of fixtures, lamps and input voltages, Aromat is the undisputed leader in the MHEB market. And Aromat backs up our products with superior application engineering support and customer service.

So don't risk your next project on just any ballast. Specify **NAIS** brand Metal Halide Electronic Ballasts from Aromat.. **"The Ones That Work!"**

Since 1986, we have been dedicated to manufacturing the highest quality, most innovative and fairly priced outdoor lighting fixtures available. In recent years, our products have been featured in such prominent venues as The Seattle Opera House, Four Seasons Hotels, Disney World, San Francisco's Embarcadero and Bellagio. When product design and durability are key design elements, residential and architectural installations demand B-K LIGHTING.

For more than 40 years, Hadco has created specification-grade lighting for three niche markets: landscape, architectural and area lighting and municipal/institutional street and area lighting. The following components are what make everything happen: signature style and an innovative approach to technologies ranging from optical engineering to energy-efficient lamp sources; component parts including aluminum, brass and copper; and a single-minded dedication to blending performance, beauty and value.

"Nice work."

Illuminaire™

The new shape of light

EGG (January 2003)

CREST (January 2003)

TRI-EGG (March 2003)

TRI-CREST (March 2003)

QUAD (May 2003)

* Quad design in large optic only

The simplistic Egg is only the first of five innovative shapes available in Holophane's new Illuminaire line. No matter which one you select, you get the durable elegance of borosilicate glass, simple maintenance and matchless Holophane performance. Choose from a range of accessories and large or compact optics to

satisfy various mounting heights*. The new Illuminaire line is proof that when it comes to lighting, your first choice should always be Holophane. Contact your local Holophane factory sales representative, call (740) 345-9631 or write to Holophane, 214 Oakwood Avenue, Newark, Ohio 43055. Visit us at www.holophane.com.

énergie™ shrink

With U.S.-based assembly, distribution and customer support, Energie delivers unique European luminaires without the usual hangups.

Arnsberg, Germany. A family-owned company committed to satisfying contemporary demands for aesthetics and functionality, in a wide range of environments, Trilux has grown into one of the largest manufacturers in all of Europe. Trilux designs stand out as architectural highlights on their own right, while offering sophisticated engineering to enhance visual quality and boost efficiencies.

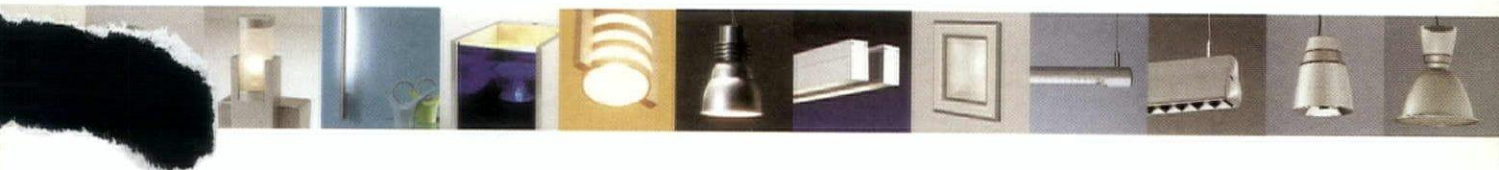

Hasselt, Belgium. Multiline's broad-based, customized lighting solutions meet the individual need of each project. Over the years, the guiding concept of responding to client needs has led to a proliferation of original designs that suit contemporary interiors and exteriors, and a focus on pleasing designers and specifiers. Quality materials and fine craftsmanship are a trademark.

multiline®

s the atlantic.

Enjoy full access to the finest international designs, all code-compliant and ready for quick delivery anywhere in North America.

Roeselare, Belgium. By merging innovative fixture design with modern technology, Wever & Ducre's luminaires add life to objects and architecture while integrating discreetly into the environment. Their wide range of architectural lighting solutions and dynamic designs are featured in the Louvre Paris, the European Parliament in Brussels and the stock exchange in Utrecht, The Netherlands.

Barcelona, Spain. One of Spain's leading lighting manufacturers, Troll's penchant for cutting-edge design and high production values has earned them an outstanding reputation among lighting designers and architects world-wide for delivering the pleasantly unexpected. Winner of numerous international design awards, Troll lighting can be found in the Bolsa Madrid and the Palacio de Congreso.

Wever & Ducre®

Here comes the sun.

Daylight was the inspiration.
Solar Megaphone™ is the result.

NATURALITE
SKYLIGHT SYSTEMS

Naturalite.
It's who we are, it's what we do.

INTRODUCING THE NEW COLLIMATING SKYLIGHT FROM NATURALITE®

The Solar Megaphone is a simple solution to a simple problem ... reaping the benefits of natural daylighting effectively and inexpensively.

Specially designed for applications utilizing a drop ceiling, it uses cutting-edge collimating technology to help bring the positive benefits of the sun into your design.

Want the best company in fiber optic lighting?

Ask the hard questions.

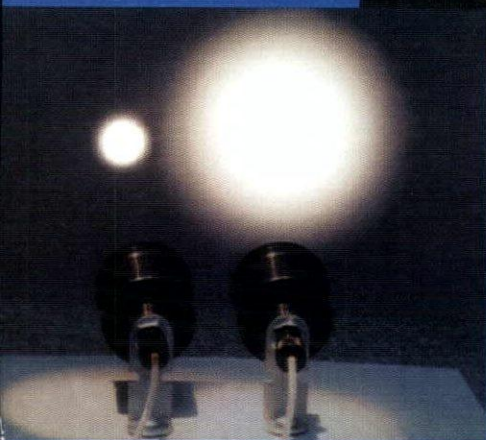

- Can you give me perfect color (3200°K), a 100 CRI, and absolutely NO UV or IR?

- Can you give me a 10-year warranty, that includes the fiber?

- Can you power 1200 individual stars with a single projector?

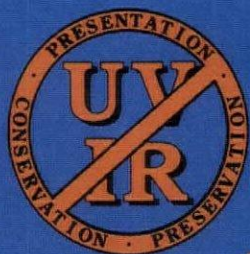

- Can you adjust individual luminaires from 5° spots to 50° floods?
- Can you focus a 20-inch diameter spot on a wall 20-feet away (with 1 fiber) or highlight objects from the top a case?

Only NoUVIR answers these questions "Yes!"

Talk to the experts (12 years, 20 patents, 14 papers and 2 books)
Get pure-white, stone-cold fiber optic lighting from ...

NoUVIR RESEARCH

Call **302-628-9933**

No competition?
But we didn't even ask about "service".

Noble,
(pronounced "no bull")
is NoUVIR's mascot.

"No bull" is also our motto.

NEW PRAIRIE WALL FIXTURE

The New Sternberg PRAIRIE Wall Fixture 700WB, is an elegant addition to any structure. This style and design is typical of Frank Lloyd Wright, Arts / Crafts and Mission traditions. Features incandescent downlighting for entry ways and lighting walls.

The stylized tree feeling is apparent in the design of the three side panels.

Cast in heavy wall aluminum with 1/4" thick white acrylic lens, it is built to last.

The 700WB coordinates with our two larger scale models and our lighted Prairie Bollards. The overall size is 12" wide x 17" high.

TIMES SQUARE[®] LIGHTING

STAGE, STUDIO, ARCHITECTURAL, AND DISPLAY

THE ART OF PROJECTION

For almost 70 years Times Square Lighting

has been an important part of the

lighting industry. We played an

instrumental role in the onset of

theatrical lighting. We led the

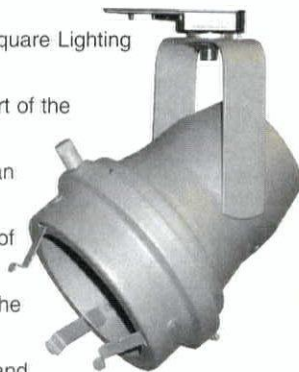

way as a top manufacturer and

supplier of special effects lighting during the disco era.

For the last 15 years we have been very busy producing

quality display fixtures.

The Watt Stopper's automatic PIR wall switch, WA-200, combines innovative detection capabilities with streamlined installation. The WA offers SmartSet technology, which automatically adjusts time-delays and sensitivity based on usage patterns. Other features include contractor-friendly, terminal-style wiring, which speeds installation time, and a built-in light level sensor.

Lighting Designed for Sophistication...

And Functionality

The Montreaux

This adjustable 2 level light has been beautifully designed for multiple work environments. Its sleek head features our parabolic louver design that directs light evenly and virtually eliminates glare from any VDT position. Montreaux's fully articulated arm comes in three arm styles, single vertical, twin vertical, and twin horizontal. Choose from an array of mounting methods that include clamps, wall brackets, table bases, or panel brackets that fit over 70 office furniture systems. Ten year warranty.

company profile

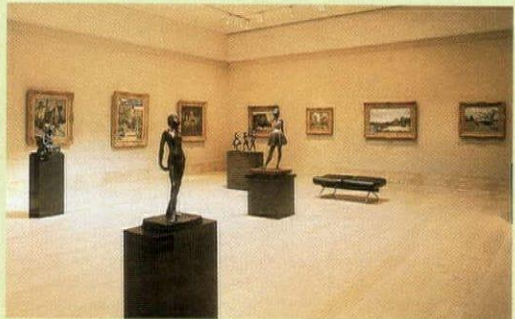

Lighting Services Inc

Lighting Services Inc (LSI) is the leading specialty manufacturer of track, accent, display and fiber-optic lighting systems. Since 1958, LSI has been dedicated to designing, engineering and manufacturing lighting fixtures of the highest quality. Our reputation for creativity and innovative design, coupled with specification-grade products and intelligent personalized service, has made us the manufacturer of choice amongst the most discriminating specifiers of lighting.

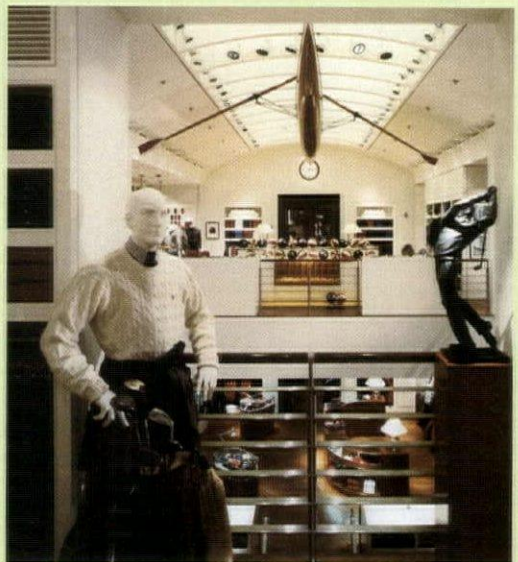

Log onto Lighting Services Inc's new website at www.LightingServicesInc.com to access Quick-Time virtual reality viewing of the latest products as well as information on all LSI products, downloads, designers, representatives, installations and industry resources.

The following environments have been enhanced by Lighting Services Inc products:

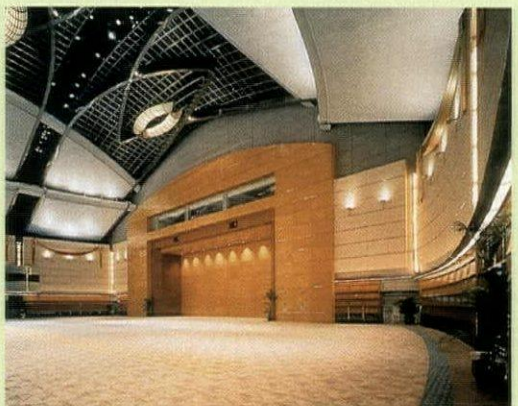

- Casinos
- Corporate Facilities
- Display Windows
- Entertainment Venues
- Health Facilities
- Hotels/Hospitality Spaces
- Houses of Worship
- Mass Transit Facilities
- Museums/Galleries/Visitor Centers
- Office Buildings
- Public Spaces

company profile

Prisma Architectural Lighting

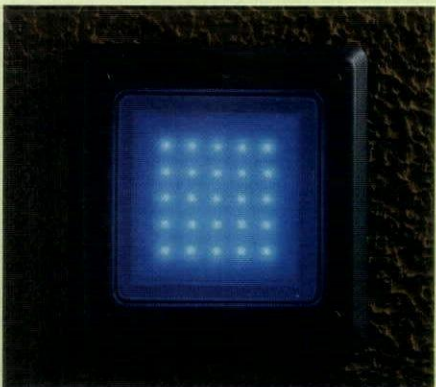

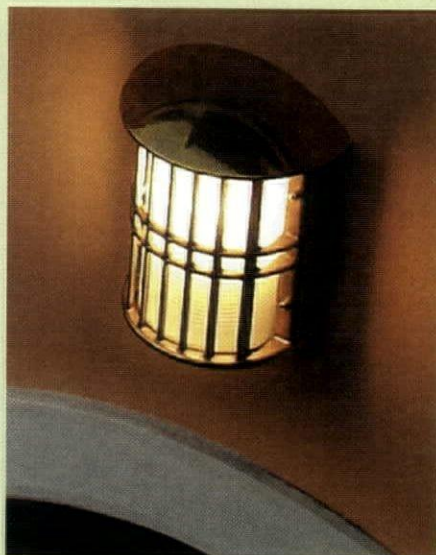

Prisma Architectural Lighting was incorporated in Lawrenceville, GA in October 1999 as the U.S. subsidiary of Prisma Illuminazione, headquartered in Verona, Italy. Prisma Illuminazione, an international manufacturer of indoor and outdoor lighting, is an offshoot of Vetrerie Lodi glass factory, which has been producing glass for the cosmetic, gift, lighting and furniture industries for over 100 years.

Prisma Architectural Lighting imports core components such as faceplates and glass from the parent company; all assembly is done with U.S. electrical components in Lawrenceville, GA. The support and commitment of the parent company allow the team at the Lawrenceville facility the flexibility to assemble and ship products within days. Typical lead-time for most catalogued items is two weeks; custom finishes can ship within four weeks. Our high-quality luminaires are produced at a very competitive price.

Prisma produces specification-grade light fixtures constructed of glass, die-cast aluminum and solid brass. The current product offering includes mainly indoor/outdoor, ceiling/wall luminaires and pedestrian-scale bollards. Currently we are releasing two new families of products; in-ground, walk-over/drive-over and recessed wall mount/walk-over. In the next few months, introductions will include a new pendant series, bollards and steplights.

The unique demands of the North American market are in the forefront when new products are in the design stage. Our U.S. team includes engineering consultants with vast experience who assist in expediting the UL process and provide support on many technical issues. Located at the parent company, our engineering staff is augmented by an internal laboratory, certified by IMQ. Our lab is able to test our prototype luminaires under conditions such as heat, water, humidity, cold, salt water, sand and impact resistance. This internal testing is extremely advantageous in expediting the UL approval process.

Our mission at Prisma Architectural Lighting is to provide products manufactured to the highest standard, competitively priced. We pride ourselves in our service, quality, customer satisfaction and flexibility.

company profile

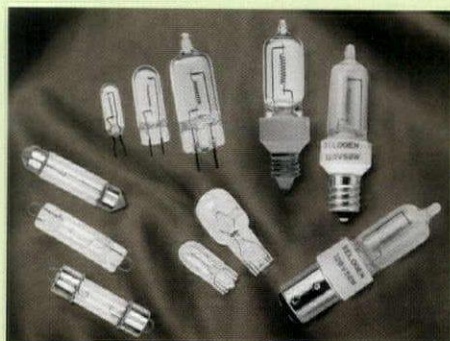

THHC Lighting

At THHC Lighting, we would like to see ourselves as a solution provider rather than just a lamp manufacturer. We feel our role in the industry is to help our customers solve problems they are having with existing light sources by providing them with the lamps that suit their needs.

Some years ago, after spending countless hours corresponding with our customers, we found that many of them were having problems with existing light sources like incandescent and halogen lamps. Problems such as short lamp life, UV rays, premature burnouts and installation difficulties plagued the lighting industry. We took what we learned to our engineers and after several years in the lab, a new light source, Xelogen, was born.

The fact that Xelogen lamps resolved the problems that the industry was facing made it a huge success. Today the Xelogen line is available in more than 50 configurations and has an enormous install base all over the world in hotels, museums, amusement parks, cruises and even space shuttles.

But even with growth, our philosophy will never change: We believe in working closely with each and every one of our customers. So no matter if you are a designer, manufacturer, reseller or even end-user, THHC Lighting is here to help you with your needs.

Xelogen Series

NeoballZ from Toshiba

advertisement

Xelogen

xenon lamps taken to the next level

*CAN BE USED IN OPEN FIXTURES
NO SHIELDING REQUIRED*

Long Life - up to **20,000** hours

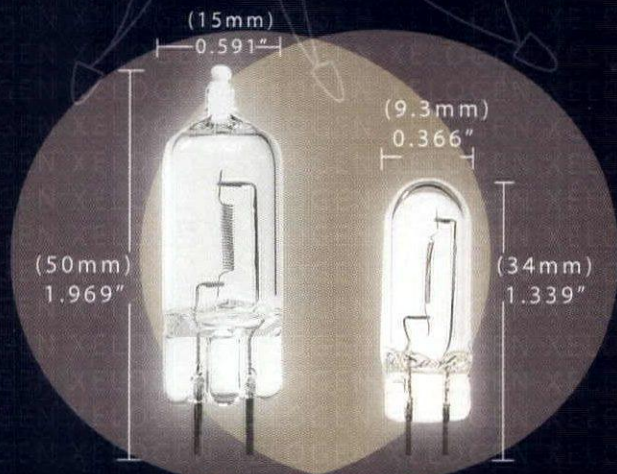

Dimmable - dimming does not shorten lamp life

Filled with low pressured Xelogen gas - glass shielding not required

Lower heat output - safer and offers more flexibility in fixture design

Do not emit damaging UV rays - ideal for artwork and sensitive fabric

Handling - can be installed with bare hands without affecting lamp life

Low Voltage Series

THHC Lighting - Synonymous with Quality Lighting Since 1986

1300 John Reed Court, Unit D, City of Industry, CA 91745 USA Phone 626.330.8368 Fax 626.330.3616 U.S. Toll Free (877) XELOGEN

Birchwood Lighting

ASHLEY, by Birchwood Lighting, is a lighting system designed to be used in cove applications. The indirect design of the fixture eliminates shadows and hot spots in the cove and on the wall that are normally caused by sockets at the end of each fixture. The specular hammer-tone reflector throws even light out into the space. ASHLEY is available with T5, T5/HO and T8 lamps. A dimming option is also available with most lamp types.

Circle No. 70

Derek Marshall Lighting

Taking its inspiration from nature, the Palm wall sconce creates a dramatic design statement with its dynamic lines and textures. This unique sconce offers an up and down soft light wash on the wall, combining aesthetic appeal and functionality. The Palm sconce is made from a technical ceramic body, shown in a stunning finish of deep antique gold leaf. The Palm is available in a variety of faux metal finishes and colors of your choice. It measures 13 in. wide x 13 in. high x 4 in. deep and is UL-listed and ADA-compliant. To see the full line of sculptural wall sconces, call for a free catalog at (800) 497-3891. Visit us on the web at www.derekmarshall.com.

Circle No. 73

Boca Flasher

Boca Flasher is introducing the latest addition to its LED bulb line: the PAR38 retrofit. This lamp is suitable for replacement of a standard incandescent source while offering the benefits of LED technology. The standard lamp is manufactured in 5K white with other color temperatures and colors available on request. www.bocaflasher.com

Circle No. 71

Electrix

The new Aspekt by Electrix. Formed, brushed aluminum housing accommodates 13 dimmable 26W compact fluorescent or 100W incandescent lamps. The Aspekt is just one of the designs from a broad range of more than 30 new models being introduced. European-inspired designs created around the guiding principles of clean lines, timeless styling and construction integrity, the new products in this series can be designed into virtually any architectural project. For more information, contact Electrix, Inc. at 45 Spring Street, New Haven, CT 06519; phone (203) 776-5577, fax (203) 624-7545 or visit www.electrix.com.

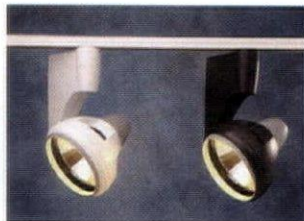

Circle No. 74

Cooper Lighting

Halo L5300 MiniLUME

Halo has introduced the first ceramic metal halide track fixture utilizing the T4.5 (20W or 39W) lamp. The MiniLUME is extremely compact in size and has amazing continuous adjustable optics from spot to flood. Ideal for accent and display applications, it also provides good color rendering, long life and high efficiency, resulting in reduced operating costs while maintaining effective visual merchandising.

Circle No. 72

Electronic Theatre Controls (ETC)

Introducing ETC's Irideon AR250 and AR250 C Exterior Wash Luminaires

ETC's Irideon AR250 exterior luminaire is a compact, powerful, color-changing fixture designed for exterior color wash. The AR250 is ideal for mid-range to smaller-scale applications with shorter lighting-punch and throw requirements and lower-wattage access. An excellent complement to the larger Irideon AR500, AR250 transforms structures and spaces into attention-getting works of art. Choose between CMY color mixing or the more economical color-wheel mechanism for exterior installations. The AR250 uses a 250W discharge lamp, DMX control and has an IP protection rating of 44.

Circle No. 75

Elite Bohemia/BarDel International, LLC

Elite Bohemia's 45-light "STRASS" crystal chandelier with matching nine-light wall sconce. Elite Bohemia Lighting, distributed by BarDel International, brings to you the finest crystal chandeliers from the Czech Republic, which use Swarovski trimmings to include "STRASS" and Spectra grades. Visit our website for more information at www.elitebohemia.com

Circle No. 76

Leviton Lighting Control Division

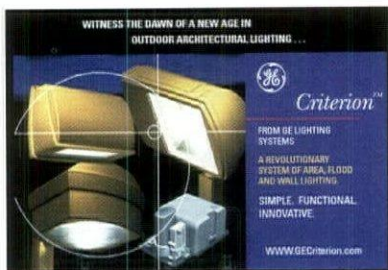

Leviton's Lighting Control Division manufactures a comprehensive line of architectural dimming systems, including systems for the entertainment industry, and the most complete line of box-mounted dimmers, occupancy sensors, timers and home controls. Leviton's new Dimensions D3200 Series Dimming System offers a level of sophistication in multi-point dimming and scene control systems that is easily accessible to residential and commercial end-users.

Circle No. 79

GE Lighting Systems

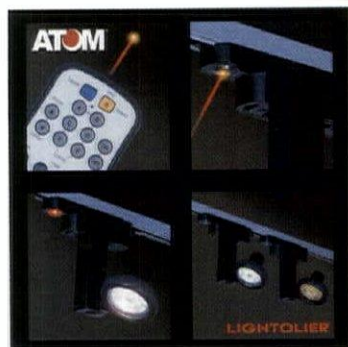

The Criterion Series is a total outdoor lighting solution offering the convenience and savings of interchangeable components, excellent optics and photometrics, as well as complete architectural styling for area, flood and wall lighting. Visit www.gecriterion.com.

Circle No. 77

Lightolier

ATOM is a sophisticated addressable track system that allows individual dimming control and lighting of track luminaires on the same circuit.

Circle No. 80

Hadco

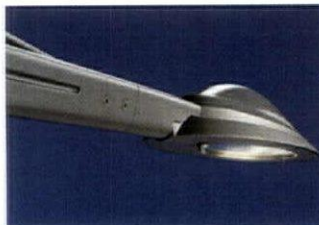

Hadco's BL5016 12V fixture has flexible applications for various landscaping needs. The housing is constructed of double gasketed, die-cast marine-grade alloy aluminum with vibration-proof, serrated teeth along the base to provide a positive lock. A 360-degree fully adjustable swivel arm allows precise lighting with angled lens for self-cleaning. The fixture is C/UL-listed for a 50W MR16 lamp. BL5016 is available in five high-quality thermoset powder-coat finishes to retain its beauty for many years.

Circle No. 78

Lumec-Schröder

The Hestia is a model that pioneers compactness in lighting. Equipped with a Sealsafe micro-reflector, the Hestia is an aesthetic revelation combined with high photometric performance. Made of aluminum and glass, Hestia (sealsafe IP66) is suitable for ceramic-arc metal halide lamps up to 150W.

Circle No. 81

Material Plane Studio

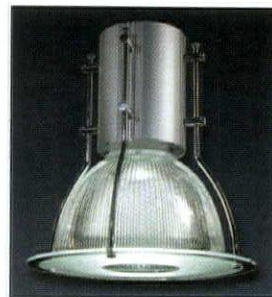

Material Plane provides high-end, one-of-a-kind, decorative lighting fixtures to the trade only. Specializing in custom fixtures, they produce hand-wrought lighting made to order in styles ranging from Arts & Crafts to Contemporary and distinguished by the use of quality materials like bronze, copper, mica, blown and slumped glass and a unique selection of finishes.

Circle No. 82

Pathway the Lighting Source

Pendalumes is a new line of decorative pendant downlights. They are available in 9-, 12-, 16- and 22-in. diameters with either a prismatic acrylic refractor or satin anodized aluminum reflector. Polished chrome arms enhance appearance and provide mounting for decorative accessories such as glass and acrylic discs. For more information, contact Pathway Lighting Products, Inc., P. O. Box 591, Old Saybrook, CT 06475 or call (800) 342-0592, fax (800) 207-0090 or visit pathwaylighting.com.

Circle No. 85

Metalumen

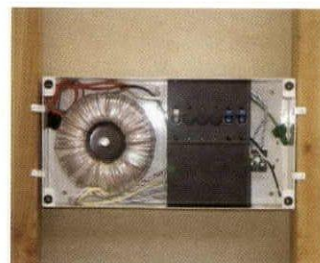

Carré—a new versatile series of square pendant fixtures from Metalumen. Choose from two sizes, six unique lighting controls including decorative glass, five mounting options and flexible configurations that offer an optimum lumen package using CF lamps. Call (800) 621-6785 or visit www.metalumen.com.

Circle No. 83

Q-Tran, Inc.

Q-Tran, Inc. manufactures Power Supplies for low-voltage lighting. This unique transformer assures no noise, full light output, complete safety and flexible installation. Q-Tran is UL-listed as a low-voltage fixture power supply center; UL-listed to be either surface- or recessed-mounted.

Circle No. 86

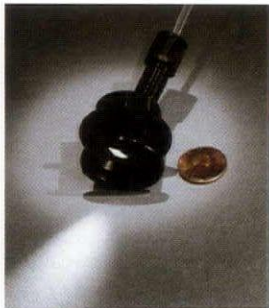

NoUVIR Research

Power 32 eyeballs from one fiber-optic lighting projector.

No UV, No IR...
NoUVIR!

- Stone-cold, pure-white light
- Perfect color
- Awesome control—zooms 50 to 5 degrees
- Beautiful beam
- Aims 30 degrees off-axis
- Locks
- Sealed
- Absolutely no UV and no IR.

Call (302) 628-9933. See our ad on page 77.

Circle No. 84

Se'lux Corp.

Se'lux announces SONNE, a new solar outdoor lighting fixture combining architectural design and advanced solar technology. SONNE is unsurpassed in reliability and durability. SONNE offers complete unit installation, maintenance-free material for luminaire, panel and battery controller enclosure, compact fluorescent lamp up to 42W, Smart Controller, environmentally friendly sealed gel batteries, galvanized steel and recycled ABS materials.

Circle No. 87

Spring City Mfg. Co.

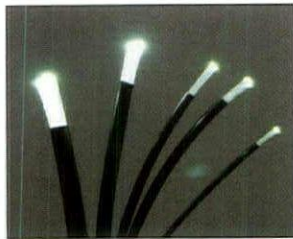

Spring City's state-of-the-art LiteShield luminaires direct light downward rather than off into the sky, efficiently illuminating your sidewalks, roadways and parking areas. LiteShield luminaires meet IES-cutoff requirements and are available in a wide variety of attractive designs. Shown here: a coach-lantern-style LiteShield luminaire mounted on an Edgewater lamp post.

Circle No. 88

Super Vision International

Super Vision International manufactures a wide range of LED and fiber-optic lighting products for architectural, signage and underwater applications. Ultra SideGlow fiber-optic cable is one of the brightest side-emitting fiber-optic cables available when combined with Super Vision's new 250W Eclipse II illuminator.

Circle No. 89

THHC Lighting

Having a reliable light source is vital to lighting projects. If nothing goes wrong, no one will notice, but an unreliable product can produce disastrous results. If a project you are working on involves compact fluorescent lamps, look no further than the Toshiba NeoballZ. A fully automated manufacturing process and the Japanese QA system's zero tolerance towards defects make Toshiba NeoballZ the most dependable CFL on the market today. Find out more at www.neoball-usa.com.

Circle No. 90

CLASSIFIEDS

SALES MANAGEMENT

Highly respected manufacturer of specification-grade luminaires is seeking an entrepreneurial professional with a proven track record of sales management success. Responsibilities include hiring, training and evaluation of sales agencies; cultivating specifier relationships; leading seminars; influencing sales policies and new product development. Reply to President, The Kirlin Company @ (313) 259-7923 or info@kirlinlighting.com.
